

# A Data-Driven Approach to Security Compliance

For fast-growing companies governing and analyzing data at scale becomes more challenging as they adopt multiple external tools and environments. The anecdotes and Snowflake partnership brings the vision of the Security Data Lake to life, enabling you to unify your Security data in one place, and to leverage it for various InfoSec and BI use cases. With this partnership you can better protect your organization using unified data, near-unlimited visibility, and powerful analytics.

## Security Data Lake + Connected Apps

The Snowflake cybersecurity ecosystem empowers security teams with additional capabilities to their cybersecurity strategy, covering a full range of use cases. By partnering and collaborating via the Snowflake Cybersecurity Workload data lake, anecdotes and Snowflake combine the power of Compliance automation and the Snowflake Data Cloud to allow organizations to gain full visibility into their security Compliance posture.

## Data Retention Without Limits

Security compliance teams need to retain security logs for annual audits, but fragmented data makes it extremely difficult for teams to keep their organizations compliant with various security controls and policies. anecdotes partnered with Snowflake to enable customers to store years of security data at a cost-effective price.

## Powerful Compliance OS

Customers can operationalize their security data that is stored in Snowflake to manage their security Compliance program on anecdotes' powerful Compliance OS. By leveraging advanced automation capabilities, and the various modules, all Compliance challenges can be fully and accurately addressed, from daily activities to audit-related tasks.

### ✓ Data-Power Your Compliance

With live data, advanced automation, and an array of applications, data artifacts are utilized to gain true visibility into the Compliance Posture.

### ✓ Consolidate Your Data

Credible datasets from various sources are automatically integrated, removing the need to gather and analyze data manually.

### ✓ Secure Data Flows

Common and unique data-driven use cases, such as BI and monitoring, can be created without compromising data security.

**Everything Compliance, all in one workspace.** anecdotes is the first operating system (OS) for every stage of a business's Compliance journey. It reshapes the way the cloud-powered world thinks about security Compliance, transforming it from a box-ticking exercise into a powerful driver of growth for scale-ups, publicly traded companies, and everything in between. With a variety of applications powered by verified data, Compliance leaders can turn manual, time-consuming, and siloed tasks into an automated, continuous, and strategic Compliance journey. That's why some of the world's fastest growing brands - Unity, Fiverr, SimilarWeb, Riskified, and more - use anecdotes. anecdotes has headquarters in San Francisco, California and R&D offices in Tel Aviv, Israel.
